### **DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a method of evaluating a data mining algorithm, classified in class 707, subclass 6.
  - II. Claim 14-22, drawn to a system for evaluating a set of data mining algorithms having a set of goals, classified in class 707, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the methods of Group I could be implemented in any server containing code means for providing such services, and not the same systems or program as described in claims 14-22.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
